

COVID-19 SHOTS UNDER-REPORTED FACTS

AUTHORIZED FOR EMERGENCY USE IN THE U.S.

PFIZER/BIONTECH

- **Abortion-derived cell lines** used in testing (HEK-293 fetal cell line)
- Emergency Use Authorization: Dec. 11, 2020
- Clinical trials scheduled to end: Jan. 31, 2023
- Mass vaccination for over 2 years **before** phase 3 clinical trials end
- Vaccine technology: experimental mRNA, no long-term studies
- No claim to "protect you" (keep you from getting COVID-19)
- No claim to "protect others" (prevent transmission of COVID-19)

MODERNA

- **Abortion-derived cell lines** used in testing (HEK-293 fetal cell line)
- Emergency Use Authorization: Dec. 18, 2020
- Clinical trials scheduled to end: Oct. 27, 2022
- Mass vaccination for almost 2 years **before** phase 3 clinical trials end
- Vaccine technology: experimental mRNA, no long-term studies
- No claim to "protect you" (keep you from getting COVID-19)
- No claim to "protect others" (prevent transmission of COVID-19)

JOHNSON & JOHNSON

- **Abortion-derived cell lines** used in vaccine development, production & testing (PER.C6 fetal cell line)
- Emergency Use Authorization: Feb. 27, 2021
- Clinical trials scheduled to end: Feb. 2, 2024
- Mass vaccination for 3 years **before** phase 1/2 clinical trials end
- Vaccine technology: Viral vector-based
- No claim to "protect you" (keep you from getting COVID-19)
- No claim to "protect others" (prevent transmission of COVID-19)

VACCINE ADVERSE REACTIONS IN 4 YEARS, 9 DAYS

38,264

DEATHS

72,721

PERMANENTLY
DISABLED

1,658,330

REPORTED REACTIONS

* VAERS data from 12.14.20 - 12.27.24 (numbers increasing daily)

Is it worth
THE RISK?

RISK

- **100% Risk to YOU | 100% Profit to Pfizer, Moderna, and J&J**
- **NOT FDA Approved.** Emergency Authorization = lower standards.
- **Can't sue company** for injury or death. PREP Act of 2005 protects companies from liability & removes accountability.
- 95% effective? Disputed by scientists who say using all trial data (not just cherry picked data) **lowers efficacy to just 19%-29%.**
- Risk of **getting sicker or dying because of vaccine** (called pathogenic priming or antibody dependent enhancement).
- Pregnant & breastfeeding? Not proven safe (no clinical trial data yet), but VAERS data shows **5,165 miscarriages** so far.
